

ACCIDENT AND EMERGENCY RADIOLOGY SURVIVAL GUIDE

## **accident and emergency radiology pdf**

An emergency department (ED), also known as an accident & emergency department (A&E), emergency room (ER), emergency ward (EW) or casualty department, is a medical treatment facility specializing in emergency medicine, the acute care of patients who present without prior appointment; either by their own means or by that of an ambulance. The emergency department is usually found in a hospital or ...

x Catastrophic, or life threatening, haemorrhage is recognised as the leading cause of preventable death in trauma patients [1] and is also prevalent in medical conditions such as obstetric complications, gastrointestinal bleeding and surgical patients with intra-operative or post-operative complications [2,3]. Patients are at particular risk of deterioration in the pre-hospital environment.

In Canada off-site liability for a nuclear accident is insured under the Nuclear Liability and Compensation Act (2015). Under this legislation, which conforms to international conventions and is conceptually similar to legislation in other countries (such as Price-Anderson in the US), all liability up to a limit of CDN\$1 billion is channelled directly to the operator.
