The geometric algebra (GA) of a vector space is an algebra over a field, noted for its multiplication operation called the geometric product on a space of elements called multivectors, which is a superset of both the scalars and the vector space. Mathematically, a geometric algebra may be defined as the Clifford algebra of a vector space with a quadratic form.

Melissa Axelsson • 3 years ago • login to reply We do not recommend a book for this course. This material was developed because there were no great algebra-based physics textbooks, they either required trig or were conceptual, and now all of the schools we have helped to implement this material do not use an accompanying textbook.
