You are generating this PDF file I assume? If so, you should be able to stream it directly into the response from whatever format you are processing it with (e.g. iTextSharp).

Displaying pdf files in a web page from a sql database

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques.. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.
