Example carboxylic acids and nomenclature. Carboxylic acids are commonly identified by their trivial names. They often have the suffix -ic acid. IUPAC-recommended names also exist; in this system, carboxylic acids have an -oic acid suffix. For example, butyric acid (C<sub>3</sub>H<sub>7</sub>CO<sub>2</sub>H) is butanoic acid by IUPAC guidelines. For nomenclature of complex molecules containing a carboxylic acid, the ...

x Large airway reconstruction is difficult and requires a flap which will mirror the tissue variety. The main challenge is to keep the reconstruction stable and prevent collapse. In this report, the authors present a laryngotracheal reconstruction with a buccal mucosa-prefabricated medial femoral condyle free flap, after chondroma excision in a one-step procedure.

Lipid profile or lipid panel is a panel of blood tests that serves as an initial screening tool for abnormalities in lipids, such as cholesterol and triglycerides. The results of this test can identify certain genetic diseases and can determine approximate risks for cardiovascular disease, certain forms of pancreatitis, and other diseases.. Lipid panels are ordered as part of a physical exam ...

Diabetes is a group of metabolic diseases characterized by hyperglycemia resulting from defects in insulin secretion, insulin action, or both. The chronic hyperglycemia of diabetes is associated with long-term damage, dysfunction, and failure of different organs, especially the eyes, kidneys, nerves, heart, and blood vessels. Several pathogenic processes are involved in the development of ...
