Over the past weekend I set out to setup Asterisk, an open source communication server, to test some of the issues reported in a thread over on the discussion forums. I had an Avaya 1120e and 1165e IP phone available to test with, however, both phones were running the UNISTim software for the Avaya Communications Server 1000. I needed to upgrade them to support SIP.

OpenStack is a free and open-source software platform for cloud computing, mostly deployed as infrastructure-as-a-service (IaaS), whereby virtual servers and other resources are made available to customers. The software platform consists of interrelated components that control diverse, multi-vendor hardware pools of processing, storage, and networking resources throughout a data center.
