x A deep-neural-network-based algorithm was used to automatically segment the prostate for a large cohort of prostate cancer patients. DNN-based prostate segmentations were compared to the consensus contour for a smaller group of patients; the agreement between DNN segmentations and consensus contour was similar to the agreement reported in a previous study.

Cancer mutations and targeted drugs can disrupt dynamic signal encoding by the Ras-Erk pathway.

Papers | Lim Lab

1. INTRODUCTION - OVERVIEW - Biology as a science deals with the origin, history, process, and physical characteristics, of plants and animals: it includes botany, and zoology. A study of biology includes the study of the chemical basis of living organisms, DNA. Other related sciences include microbiology and organic chemistry.

The microbial adaptive immune system CRISPR mediates defense against foreign genetic elements through two classes of RNA-guided nuclease effectors.

Cpf1 Is a Single RNA-Guided Endonuclease of a Class 2

Plant disease resistance protects plants from pathogens in two ways: by pre-formed structures and chemicals, and by infection-induced responses of the immune system. Relative to a susceptible plant, disease resistance is the reduction of pathogen growth on or in the plant (and hence a reduction of disease), while the term disease tolerance describes plants that exhibit little disease damage ...

Plant disease resistance - Wikipedia

From a physics perspective, living beings are thermodynamic systems with an organized molecular structure that can reproduce itself and evolve as survival dictates. Thermodynamically, life has been described as an open system which makes use of gradients in its surroundings to create imperfect copies of itself. Hence, life is a self-sustained chemical system capable of undergoing Darwinian ...

The Facilitator's Guide to Resilience

1. Introduction. The goal of anticancer immunotherapy is to re-establish and enhance the antitumour immune response without causing concomitant autoimmunity that may itself result in significant morbidity.
