An intrusion detection system (IDS) is a device or software application that monitors a network or systems for malicious activity or policy violations. Any malicious activity or violation is typically reported either to an administrator or collected centrally using a security information and event management (SIEM) system. A SIEM system combines outputs from multiple sources, and uses alarm ...

News Release UTPB to preserve various materials into accessible digital archives Watch for the virtual library, with 3-D no less Nov. 17, 2017. There is a saying that: "Once you have poured your heart and soul into a master's thesis that only a handful of people will have read it (namely your committee), and the bound book that you purchase will languish on your bookshelf gathering dust."
