Genome: The Autobiography of a Species in 23 Chapters is a 1999 popular science book by the science writer Matt Ridley, published by Fourth Estate. The chapters are numbered for the pairs of human chromosomes, one pair being the X and Y sex chromosomes, so the numbering goes up to 22.. The book was welcomed by critics in journals such as Nature and newspapers including The New York Times.

Genome (book) - Wikipedia

A genome sequence is the complete list of the nucleotides (A, C, G, and T for DNA genomes) that make up all the chromosomes of an individual or a species. Within a species, the vast majority of nucleotides are identical between individuals, but sequencing multiple individuals is necessary to understand the genetic diversity.

The WORLD TRANSFORMATION MOVEMENT (WTM) is a not-for-profit organisation dedicated to transforming the individual, the human race and thus our world through bringing psychologically relieving biological understanding to the underlying problem in all human affairs of the human condition — which is our species' extraordinary capacity for what has been called 'good and evil'.

The Breakthrough Biological Explanation Of The Human

In this survey text, directed at those not majoring in biology, we dispel the assumption that a little learning is a dangerous thing. We hope that by skimming the surface of a very deep subject, biology, we may inspire you to drink more deeply and make more informed choices relating to your health, the environment, politics, and the greatest subject that are all of us are entwined in, life itself.

Preamble Ethical background All human interaction, including the interaction involved in human research, has ethical dimensions. However, 'ethical conduct' is more than simply doing the right thing. It involves acting in the right spirit, out of an abiding respect and concern for one's fellow creatures.

National Statement on Ethical Conduct in Human Research

Synopsis The National Statement is intended for use by: any researcher conducting research with human participants; any member of an ethical review body reviewing that research; those involved in research governance; and potential research participants. The National Statement is developed jointly by the National Health and Medical Research Council, the Australian Research Council and ...
