Chapter 35

Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

Nutrition - Wikipedia

Glycerophospholipids, usually referred to as phospholipids (though sphingomyelins are also classified as phospholipids), are ubiquitous in nature and are key components of the lipid bilayer of cells, as well as being involved in metabolism and cell signaling. Neural tissue (including the brain) contains relatively high amounts of glycerophospholipids, and alterations in their composition has ...

Dr. T. Colin Campbell of Cornell University co-directed one of the most comprehensive nutrition studies ever undertaken, the China Project. Together with his son Dr. Thomas M. Campbell they shared his research findings in their best selling book The China Study.

The China Study - T. Colin Campbell Center for Nutrition

I suggest you read "The World Turned Upside Down" to get the full context. In the first chapter he says he said this as a joke at a conference, but then goes on to elaborate on the virtues of fasting, low carb and carbs that don't raise your blood sugar.

Screening for Type 2 Diabetes in Adults. A substantial number of Canadians are living with diabetes that has not yet been diagnosed. The estimated prevalence of undiagnosed type 2 diabetes in the general population is 1.13% by fasting plasma glucose (FPG) levels and 3.09% by glycated hemoglobin (A1C) criterion, contributing to 20% to 40% of total diabetes cases .
