Jellyfish or sea jellies are the informal common names given to the medusa-phase of certain gelatinous members of the subphylum Medusozoa, a major part of the phylum Cnidaria. Jellyfish are mainly free-swimming marine animals with umbrella-shaped bells and trailing tentacles, although a few are not mobile, being anchored to the seabed by stalks.

Crocodylia (or Crocodylia) is an order of mostly large, predatory, semiaquatic archosaurian reptiles, known as crocodylians. They first appeared 95 million years ago in the Late Cretaceous period (Cenomanian stage) and are the closest living relatives of birds, as the two groups are the only known survivors of the Archosauria. Members of the order's total group, the clade Pseudosuchia, appeared ...

Os crocodylianos são excelentes nadadores. Durante a locomoção aquática, a sua cauda muscular ondula de um lado para o outro impulsionando-o pela água, enquanto que as patas se mantêm juntas ao corpo para reduzir a fricção. [20] [31] Quando o animal precisa de parar, virar ou realizar manobras em diferentes direcções, estende as patas convenientemente.
