

CHAPTER 51 ANIMAL BEHAVIOR

chapter 51 animal behavior pdf

Collective animal behavior is a form of social behavior involving the coordinated behavior of large groups of similar animals as well as emergent properties of these groups. This can include the costs and benefits of group membership, the transfer of information across the group, the group decision-making process, and group locomotion and synchronization.

Collective animal behavior - Wikipedia

Animal sexual behaviour takes many different forms, including within the same species. Common mating or reproductively motivated systems include monogamy, polygyny, polyandry, polygamy and promiscuity. Other sexual behaviour may be reproductively motivated (e.g. sex apparently due to duress or coercion and situational sexual behaviour) or non-reproductively motivated (e.g. interspecific ...

1.. Introduction Human-horse relationship has a long and varied history. While meat may have been the first motivation in the very early stages for domestication, horses became progressively important "tools" for transportation and, like other domestic animals, they are currently more and more used as companion animals (Digard, 1999). Contrarily to many other domestic ungulates, which are ...

There is clear evidence that parents can and do influence children. There is equally clear evidence that children's genetic makeup affects their own behavioral characteristics, and also influences the way they are treated by their parents. Twin and adoption studies provide a sound basis for estimating the strength of genetic effects, although heritability estimates for a given trait vary ...

Introduction. Nutrition therapy and counselling are an integral part of the treatment and self-management of diabetes. The goals of nutrition therapy are to maintain or improve quality of life and nutritional and physiological health; and to prevent and treat acute- and long-term complications of diabetes, associated comorbid conditions and concomitant disorders.
