The Division of Economic and Health Policy Research conducts independent research on competition in health insurance markets. A key question of public policy is whether health insurance markets are competitive or whether insurers have market power, which can harm consumers and health care providers.

The formula for survival in resuscitation describes educational efficiency and local implementation as key determinants in survival after cardiac arrest. Current educational offerings in the form of standardized online and face-to-face courses are falling short, with providers demonstrating a decay of skills over time. This translates to suboptimal clinical care and poor survival outcomes from ...
