Positive economics (as opposed to normative economics) is the branch of economics that concerns the description and explanation of economic phenomena. It focuses on facts and cause-and-effect behavioral relationships and includes the development and testing of economics theories. An earlier term was value-free (German: wertfrei) economics. Positive economics as science, concerns analysis of ...

Senate Majority Leader Mitch McConnell took the time this week to pen an opinion piece in the Washington Post warning of the dire consequences that would happen if the Democratic House's first bill (H.R. 1, or the "For The People Act") ever became law. He calls it the "Democrat [sic] Politician Protection Act." However, he really fails to explain why anything in the act (other than changes to ...
