Software productivity is a deceptively simple concept, but a matter of some debate. Although its earliest measurement was in lines of code per man-hours worked, a better definition is the ratio between the functional value of software produced to the labor and expense of producing it. There are ...

Meaning. Autopoiesis was originally presented as a system description that was said to define and explain the nature of living systems. A canonical example of an autopoietic system is the biological cell. The eukaryotic cell, for example, is made of various biochemical components such as nucleic acids and proteins, and is organized into bounded structures such as the cell nucleus, various ...
